

[1] In England, when you are sick, you go to your local doctor near your home. The doctor examines you and usually gives you a prescription for some medicine. You get the medicine at the pharmacy. If your problem is very serious, then he suggests you go to a specialist. People with a simple cold or cough don't go to their doctor; they go to the pharmacist in order to buy medicine. Doctors only come to your home when you're very sick.

[2] In an emergency, you can call on ambulance on 999. The ambulance takes you to hospital for treatment. Friends and relatives can visit you in hospital at certain times of the day, but they shouldn't stay with you for a long time. You don't pay for a visit to the doctor.

A. Circle T (True) or F (False) 3pts

- 1. The text is about medical care in one of the countries in Britain. T F
- 2. The doctor gives you medicines after he examines you. T F
- 3. People buy medicines from hospitals. T F
- 4. Your friends can visit you in hospital at some specific times. T F
