[1] In essence, **sustainable development** (SD) refers to living in a way that meets the needs of the present without risking the ability of future generations to meet their own needs. In other words, sustainable development answers the question “how can we continue to develop and grow while ensuring we don’t deplete our natural resources?”

[2] Sustainability lies in thinking about balancing economic growth, environmental stewardship, and social inclusion. The word “sustainability” comes from the Latin word *sustinere* which is made up of *tenere* (hold) and *sus* (up), meaning to remain strong and successful.

[3] Broad concepts like poverty reduction, peace and justice, health care, innovation, and climate change, etc are all types of sustainable development.
